

## **MediRätt: Partial registration of exercised warrants**

**An additional 700,000 shares have been subscribed and paid for under the TO4B option programme, which has provided the company with fresh working capital of SEK 3.5 million.**

Following this latest registration, the company's working capital amounts to SEK 10,672,028, while the number of shares stands at 10,672,082. This increase includes the 600,000 TO4B that Björn Rosengren was required to pay by March 31, 2017. However, he has chosen to pay the full amount now. The remaining 100,000 shares are subscribed by chairman of the board Anders Säfwenbergs, (50,000), and by CEO Carl Johan Merner, (50,000).

### MediRätt in brief

An average of eight elderly people die, and a further 500 are admitted to hospital in Sweden every day due to drug side effects, even though a solution to the problem exists. This is also a serious issue worldwide. MediRätt's business concept is to develop and market products that support more qualitative and safer healthcare in the home on the Swedish and international market. The Company has developed MediKoll and Dosell, which together form a unique overarching concept that ensure the elderly receive reliable and safe medication.
