Ferroamp exhibits at Intersolar and launches a new energy storage solution

Ferroamp is exhibiting at the Intersolar and SmarterE trade fair in Munich during the period 15 - 17 May. SmarterE is the major global arena for suppliers and customers in the field of solar energy, energy storage and charging infrastructure for electric cars. Ferroamp's products and solutions can be seen in stand C2.134.

In connection with the fair, Ferroamp are also launching a new energy storage solution, Ferroamp Power Storage Module. The battery is particularly developed for villas and smaller properties and for the applications that are relevant in the Nordic countries with managing power peaks and enabling more efficient charging of electric cars. The system has integrated electronics and is fully compatible with Ferroamp's EnergyHub system. All Ferroamp's customers have the opportunity to supplement their existing facilities with this battery. The development has been done in close cooperation with Sunwoda Energy Solution in China. Sunwoda Energy Solution is one of the biggest battery manufacturers in the world, with batteries ranging from mobile phones to electrical vehicles and supplying high quality batteries to several multinational players.

"-With this new energy storage solution we are complementing our product range. By that we can now offer the market a full range of optimized energy storage solutions for everything from small villas up to larger facilities. We are also very happy with our cooperation with Sunwoda, one of China's most recognized manufacturers of lithium-ion batteries." says Olof Heyman, CEO, Ferroamp.

"We are very happy to partner with Ferroamp in this launch of a Energy Storage system optimized for the European customers and applications. Our LFP battery technology is also one of the safest battery chemistries on the market." says Haiwei Xiao, VP, Sunwoda Energy Solution.

About Ferroamp Elektronik

Swedish Ferroamp Elektronik AB (publ), founded in 2010, is a fast-growing company within cleantech that offers advanced energy and power optimization solutions for real estate. Ferroamp has a scalable platform that offers the opportunity to combine patented technology in a self-developed EnergyHub with alternative energy sources and energy storage. In a unique solution, several buildings can also be connected in a microgrid - Powershare. Today, customers are primarily property companies / owners, energy consultants and electric power companies. Ferroamp has received several prominent international environmental awards. The head office is located in Spånga outside Stockholm. G&W Fondkommission is Certified Adviser: e-mail ca@gwkapital.se, telephone +46 8 503 000 50.
