Pressrelease

2021-04-01

## **Raytelligence – new release EaZense**

Raytelligence has released a new release of the cloud-based sensor system EaZense with additional features:

- People counting, which means that up to 5 people in a room can be counted
- Updated user interface with access to real-time presentation of people's position.
- Activity levels for people in the room.
- Possibility to update all software in the sensors from the cloud service.
- Possibility to connect external system via an open interface (API)

There are already functions as:

- Fall detection
- Presence detection

"This is the second release of several during the year that provides even more user benefit," says Klas Arvidson, CEO Raytelligence

Questions are referred to:

Klas Arvidson, VD Raytelligence
