

## **Huawei and Meltron launch collaboration to introduce a new digital approach to boost sustainable development of cities worldwide**

Huawei Technologies Oy and Meltron Oy have entered into a Memorandum of Understanding and agreed a plan to introduce an ambitious solution which combines and integrates the strengths of the cutting-edge ICT technologies offered by Huawei and the superior Meltron lighting solutions.

Comprehensive ICT solutions with zero carbon emissions, combined with resilient and superior light applications for smart cities, will equip cities for the increasingly digitalised and sustainable world.

Under the traditional approaches, lighting solutions have not been fully integrated to the data and communication network. In the new world, however, lighting becomes a vital part of the infrastructure. The new and converged technology and architectural design will change the city management approach by the implementation of climate neutral, zero-carbon ICT solutions meeting the expectations of future. This unique and combined offering will also represent a strong statement by both Huawei and Meltron in relation to the global drive for long term sustainability and safety in the infrastructure space.

"This is an excellent example of a highly successful Huawei collaboration with a leading Finnish technology company to be able to introduce a totally unique solution to the modern society", says Ye Feiwei, the Country Manager and CEO of Huawei Technologies in Finland.

"I am happy that we can take part in the digital journey based on the exceptional partnership with Meltron. This can bring significant value to the concept of a truly holistic smart city solution presented by Huawei. Together we can light up the cities offering the unique solutions based on the cutting-edge ICT as the key enabler for cities to address rising challenges in a smart manner. Our goal is to bring a new value to cities worldwide, ensuring more efficient city management and sustainable development and improving living experience," explains Małgorzata Pawłowicz, the Government Industry Expert, Huawei CEE & Nordic region.

"This is a true breakthrough and recognition for Meltron's exceptional technology in the increasingly important and fast growing global lighting and infrastructure space. Huawei is a true global technology leader and we are truly honored to work with them. This cooperation will be a true game-changer immediately elevating both Huawei and Meltron to a new thought and design-leadership level in the fast-growing global

business for sustainable infrastructure. We will offer a set of completely new and value-adding solutions to our customers on a global basis” says Ville Sistonen, the CEO of Meltron.

### **Huawei Technologies**

*Huawei is a leading global provider of information and communications technology (ICT) infrastructure and smart devices. With integrated solutions across four key domains – telecom networks, IT, smart devices, and cloud services – we are committed to bringing digital to every person, home and organization for a fully connected, intelligent world.*

*Huawei's end-to-end portfolio of products, solutions and services are both competitive and secure. Through open collaboration with ecosystem partners, we create lasting value for our customers, working to empower people, enrich home life, and inspire innovation in organizations of all shapes and sizes. At Huawei, innovation focuses on customer needs. We invest heavily in basic research, concentrating on technological breakthroughs that drive the world forward. We have 194 000 employees, and we operate in more than 170 countries and regions. Founded in 1987, Huawei is a private company fully owned by its employees. For more information, please visit Huawei online at [www.huawei.com](http://www.huawei.com).*

### **Meltron – “More than Just Light”**

*Meltron AB designs, manufactures and sells LED lighting solutions which are based on interdisciplinary application of electronics, optics, thermodynamics and nano-structures. “More than Just Light” translates into energy savings, superior light quality, product life-time savings, increased productivity, safety and wellbeing for all. Meltron provides high quality solutions for the most demanding environments in infrastructure, industry, logistics and agriculture. Read more at [www.meltron.com](http://www.meltron.com)*

Meltron is traded on NGM Nordic SME under short name **MLTR**.
