

## **Trijo announces partnership with Freja eID to enable expansion**

Stockholm, March 11, 2022

Ijort Invest AB, branded as Trijo, a subsidiary of Arcane Crypto today announced their partnership with Freja eID, a provider of digital identification services.

Freja's solution allows Trijo to onboard customers from all Nordic countries.

Torbjørn Bull Jenssen CEO of Arcane Crypto, says "“This partnership allows us to access new markets while at the same time ensuring both strong compliance and improved customer experience. As a bonus we are reducing our reliance on local banks.”"

Johan Henrikson, CEO of Freja eID Group says, "Crypto, blockchain and digital currencies have been mentioned in many customer discussions during the last few years. Secure logins and identification is a given in financial transactions. Now Freja is entering the crypto world together with Trijo. Freja can ensure a solid know your customer process combined with strong identification and good customer experience.”"

### **About Trijo**

Trijo is a Swedish-based real-time cryptocurrency exchange and is registered with the Swedish Financial Supervisory Authority. Trijo provides a simple and secure onboarding process to buy and sell cryptocurrency. Trijo's operations also include the news service Trijo News, which is run editorially independent of other operations.

### **About Freja eID**

Freja eID Group AB (publ) develops products and services for digital identification. The business areas include the internationally scalable electronic identity Freja eID and secure fulfilment services.

### **About Arcane Crypto**

Arcane Crypto develops the infrastructure and products that enable worldwide adoption of bitcoin and digital assets. Arcane is building a platform for users to learn, trade and invest in digital assets, all from one account. Our market leading research content educates our users and builds trust. Arcane achieves scale by providing a platform with open APIs, allowing third parties to develop their own products using our technology and then distribute their product to our users.
