AAC Clyde Space is a research client of Edison Investment Research Limited

AAC Clyde Space has delivered a strong Q121 with revenue growth of 55% and a substantial reduction in EBITDA losses. The ongoing activities continued to develop, positively augmented by initial contributions from the 2020 acquisitions of Hyperion and SpaceQuest, both of which continue to deliver positive EBITDA. With Omnisys acquired in April alongside the SEK100m fund-raising, AAC Clyde Space remains well positioned to execute its growth strategy in the New Space market.

Organic growth and transforming acquisitions

Ongoing activities grew revenues by 24% to SEK29.5m with the acquisitions of Hyperion and SpaceQuest adding SEK3.4m and SEK3.9m respectively in their first full quarter of consolidation. Clyde Space reduced its EBITDA loss by 90% to SEK0.5m (Q120: SEK5.4m) on sales up 23% at SEK17.1m. It grew platform (+35%) and subsystem (+103%) revenues, more than offsetting the absence of Space Data as a Service (SDaaS) sales (Q120: SEK2.4m). AAC in Sweden increased sales by 24% to SEK12.4m, boosted by platform revenues of SEK2.8m following the start of production in FY20 and SEK1.4m in licence income. Its subsystems revenues fell 18% against a strong Q120, but we expect the segment to progress positively for FY21. The EBITDA loss increased to SEK1.7m including licence income. SpaceQuest contributed positive EBITDA of SEK1.1m (margin 29.3%) and Hyperion EBITDA was SEK0.6m (margin 17.6%). The group EBITDA loss reduced to SEK0.5m (Q120: loss SEK6.2m).

Moving up the value chain

The order backlog reduced to SEK141.8m (FY20: SEK156.3m). Following the acquisition of Omnisys, which added SEK130m, the group backlog at 30 April 2021 was SEK260.4m. Management sees a strong pipeline of order opportunities across the group, which should convert during FY21. It expects FY24 revenues of SEK500m, which should also see the mix shift towards SDaaS sales (FY24: c SEK55m), which are expected to earn margins roughly double the 15–20% margins typically achieved for Space Products & Components and Space Missions (including satellite platforms). We expect SDaaS to be the dominant revenue stream by the end of the decade, improving earning quality and cash conversion.

Valuation: Heading towards profitable growth

Net cash of SEK36.8m at end-Q121 has been strengthened in April by the SEK68m net proceeds from the fund-raising after paying the initial cash consideration for Omnisys. AAC Clyde Space is well positioned to invest in further organic growth and value-enhancing acquisitions. Our capped DCF value remains at SEK5.6.

The revenue, EBITDA and operating profit development during Q121 is as shown below. We note that the SDaaS revenue was generated by SpaceQuest in Q121, with the balance in Space Products. Hyperion revenues are entirely attributable to the sale of Space Products.

The order backlog has declined in recent periods, partly due to currency but also reflecting the absence of substantial incremental order flows. We expect order intake to improve in the remainder of FY21. The addition of Omnisys's SEK130m backlog space products has almost doubled the Q121 backlog level following its consolidation in April 2021.
